January 2017

Strong Corn Exports for Russia and Ukraine

A Record for Russia

Record global corn consumption, large exportable supplies, and favorable exchange rates have supported growth for Russia and Ukraine's corn exports. For example, since 2014, both the *hryvina* (Ukraine's currency) and *ruble* (Russia's currency) have depreciated more than 40 percent against the U.S. dollar.¹ Moreover, Russia and Ukraine prohibit plantings of genetically modified corn, therefore providing a competitive edge in certain markets.

For Russia, exports for 2016/17 (Oct-Sep) are projected to break the previous record. Compared with 2011/12, exports have more than doubled. Russia's proximity to both the Middle East and Asia has helped fuel recent growth, as many countries in these regions have boosted imports to meet burgeoning demand.

Ukraine's Exports To Rebound

Ukraine's situation is different: 2016/17 exports are forecast up from last year and the third-largest on record. Ukraine has not seen the degree of Russia's growth, even though the country still manages to export about two-thirds of production. Large exports have been sustained by robust demand from Europe and Asia, as well as growth in North African and Middle Eastern countries.

These trends are noteworthy since Ukraine and Russia compete with the United States in several markets, especially Egypt, South Korea, and Japan. Both Black Sea countries have sustained export growth that helps meet record global corn consumption.

¹Using data from the National Bank of Ukraine and Central Bank of Russia, the December 31, 2013 values for the UAH/USD and RUB/USD were compared to December 31, 2014. It is important to note that the *hryvina* and *ruble* also fell over 40 and 30 percent against the Euro during the same period.

Note: Consumption in this table has not been adjusted for differences in marketing year imports and exports and therefore differs from global totals shown elsewhere. Marketing years for U.S. grains are: Wheat (Jun-May), Rice (Aug-Jul), Corn (Sep-Aug). 'Marketing Year' column is germane for U.S. wheat only.

WHEAT: WORLD MARKETS AND TRADE

OVERVIEW

Global wheat production, already at a record, is raised even higher this month mainly on larger crops in Argentina, the EU, and Russia. Global trade is boosted to a new record with stronger import demand from several Asian countries and Brazil. Larger exports for Australia, Argentina, and the EU are partially offset by a decrease for Canada. The U.S. season-average farm price is raised \$0.10 to \$3.80 per bushel.

U.S. PRICES:

Domestic: Price changes for wheat classes were relatively modest during December. Hard Red Winter (HRW) was up \$8/ton to \$191 and Hard Red Spring (HRS) gained \$2/ton to \$255 based on a slight pickup in foreign demand, highlighted by India's announced elimination of its import duty. Soft Red Winter (SRW) and Soft White Winter (SWW) were both down \$1/ton to \$174 and \$187 respectively, continuing to be weighed by large global supplies.

INDIA SHIFTS TO NET IMPORTER AS SUPPLIES TIGHTEN

India's wheat supplies in 2016/17 have tightened relative to growing domestic demand, leading the country to shift from a net exporter to a net importer. Reacting to tight supplies, the government eliminated its import duty in December 2016. Imports are estimated at 3.7 million tons in 2016/17, which would be the highest in 10 years. This is particularly noteworthy given that just 3 years ago India was exporting over 6 million tons, making it the eighth largest exporter at the time.

This is not the first time that India has switched from an exporter to an importer. India followed a similar pattern in 2005/06 when production was down and stocks were exceptionally tight. Akin to the current situation, the government eliminated its import duty and imports surged in 2006/07 to the highest level in over 30 years (6.7 million tons). Furthermore, exports were banned during that period. With a build-up in supplies toward the end of that marketing year, the duty was reinstated and imports fell substantially the next year. Production and stocks grew for several years until the export ban was lifted in 2011 and India re-emerged as a net exporter.

India's recent exports have mainly been to Bangladesh, Indonesia, and the United Arab Emirates. Currently a net importer, India joins these markets in sourcing wheat from Australia, Russia, and Ukraine. With abundant global supplies, it will not be difficult to find the needed wheat in exporting countries.

TRADE CHANGES IN 2016/17

Selected Exporters

- **Argentina** is up 800,000 tons to 9.0 million on a faster pace of shipments as well as a larger crop.
- **Australia** is boosted 500,000 tons to 23.5 million due to ample supplies, competitive prices, and larger expected demand from Asian countries.
- **Canada** is lowered 500,000 tons to 21.0 million due to slower-than-expected exports.
- The **EU** is raised 500,000 tons to 25.5 million based on a faster-than-expected pace of trade.
- **Ukraine** is lifted 200,000 tons to 15.7 million based on stronger demand from Asian countries.

Selected Importers

- **Bangladesh** is raised 200,000 tons to 5.3 million on a stronger pace of trade and higher expected food use.
- **Brazil** is up 300,000 tons to 7.3 million on rebounding food use, evidenced by the fast pace of trade.
- **India** is boosted 700,000 tons to 3.7 million as the removal of the import duty is expected to spur additional demand.
- **Vietnam** is up 300,000 tons to 3.6 million based on stronger trade and expectations of larger feed and residual use.

RICE: WORLD MARKETS AND TRADE

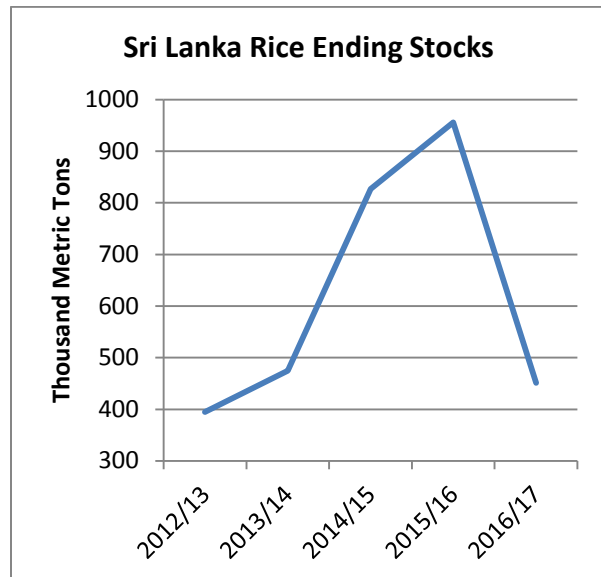

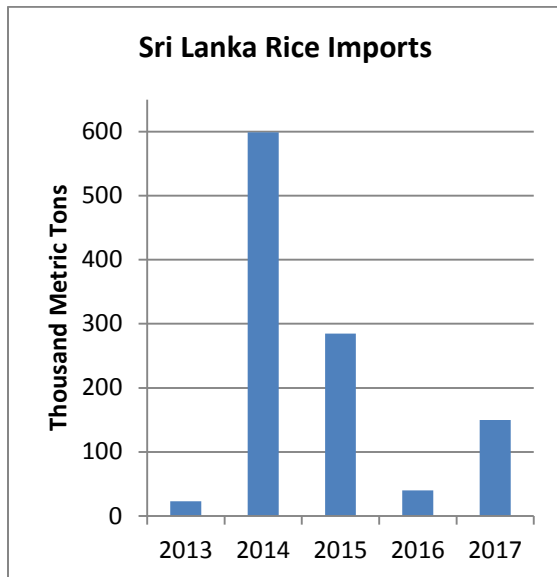

OVERVIEW

For 2016/17, global rice production is lowered this month on downward revisions to the crops in the United States, Sri Lanka, Pakistan, and Brazil. However, production remains at a record. Global trade is up, with higher imports for Sri Lanka and the EU. Exports are raised for Thailand. Global stocks are revised lower with reductions to Vietnam and Sri Lanka, though still up from the previous year.

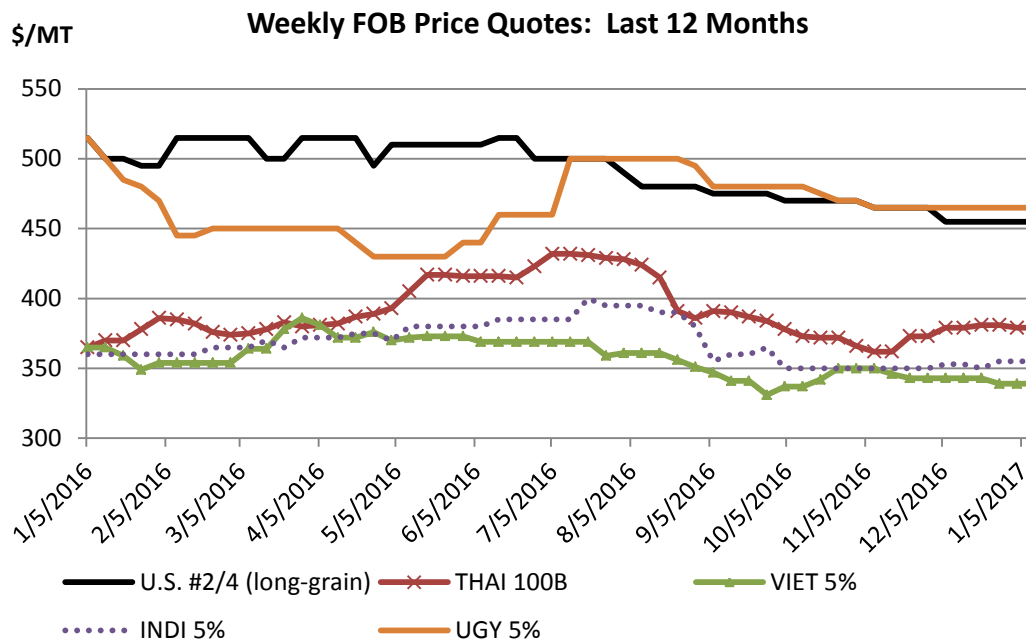

FEATURE

After a brief absence from the market in 2016, Sri Lanka is forecast to return as an importer in 2017, based on expectations of a 30 percent smaller crop amid a drought (see [World Agricultural Production January 2017](#)). As prices have risen, the Sri Lankan government has taken measures to facilitate imports of rice by removing levies and import taxes, authorizing private sector imports, and initiating government purchases from overseas. Historically, India has been the primary supplier.

However, the 1-million-ton shortfall is not expected to be met exclusively by imports, nor are imports forecast to rise to the 2014 level. In contrast to that period, Sri Lanka has begun this year with more ample carry-in stocks still available from the record 2015/16 crop. The government has already announced plans to release the majority of its reserves and has called upon the private sector to draw down its stocks as well.

PRICES

Exporter quotes for long-grain rice remained fairly stable over the past month. Thai and Indian quotes are \$379/MT and \$355/MT, respectively. The Vietnamese quote declined slightly to \$339/MT, reflecting weak demand from traditional Asian buyers. The Western Hemisphere quotes remained at \$465/MT for Uruguay and \$455/MT for the United States on thin offshore demand.

SELECTED TRADE CHANGES for 2017

- **Indonesia** imports are lowered 250,000 tons to 1.0 million on sufficient supplies and declining per capita demand.
- **Sri Lanka** imports are raised sharply by 130,000 tons to 150,000 on a much smaller crop.
- **Thailand** exports are raised 200,000 tons to 9.7 million on continued competitiveness amid ample supplies.

SELECTED TRADE CHANGES for 2016 – based on trade data

- **Pakistan** exports are raised 100,000 tons to 4.3 million.
- **Philippines** imports are lowered 200,000 tons to 800,000.
- **Thailand** exports are raised 300,000 tons to 9.5 million.
- **Vietnam** exports lowered 300,000 tons to 5.1 million.

NOTES: Regional definitions appear on last page of this circular. Imports are reported on a trade year basis. All other data are reported using local marketing years.

COARSE GRAINS: WORLD MARKETS AND TRADE

OVERVIEW

Global corn production for 2016/17 is lower from last month with reductions for the United States and Bolivia more than offsetting an increase for Serbia. Global trade is projected slightly higher led by larger imports for Bolivia, Brazil, and the United States more than offsetting a reduction for Indonesia. Exports are raised for the EU and Serbia. The U.S. season-average farm price is up 5 cents to \$3.40 per bushel.

PRICES

Since the release of the December WASDE, South American quotes remain elevated on tight nearby supplies relative to other origins. Both Argentine and Brazilian quotes are at \$183 and \$185 per ton, the same as a month ago. The Black Sea quote has been largely range-bound, ending up \$2 per ton to \$169 on steady demand for exports. The U.S. quote is up \$6 per ton to \$165 on strong sales and shipments. Since February 2016, U.S. corn has remained the lowest on a FOB basis, reflecting abundant supplies in the United States relative to other exporters.

TRADE CHANGES IN 2016/17

Selected Exporters

- **EU corn** is raised 200,000 tons to 2.0 million in light of the brisk pace for “customs surveillance” data.
- **Serbian corn** is boosted 300,000 tons to 2.5 million on account of higher production and competitive prices.

Selected Importers

- **Brazilian corn** is raised 700,000 tons to 1.8 million reflecting stronger imports to date. Marketing year (MY) 2015/16 (Mar 2016-Feb 2017) imports are boosted 700,000 tons to 3.0 million on the stronger pace to date. Consequently, trade year 2016/17 (Oct 2016-Sep 2017) imports are raised the same amount to 1.8 million. MY 2015/16 exports are cut 1.5 million tons to 15.0 million on the slower pace to date. With larger imports and smaller exports, domestic consumption is projected higher. Estimated ending stocks are increased modestly, although remain relatively tight. Domestic consumption for 2016/17 is projected higher on growing demand for feed, particularly from the pork and poultry sectors.
- **Bolivian corn** is up 300,000 tons to 450,000 partly offsetting the decimated crop.
- **Indonesian corn** is cut 700,000 tons to 1.0 million on the slower pace of trade. Import-restrictive policies are also expected to discourage imports.
- **U.S. corn** is boosted 150,000 tons to 1.4 million on trade to date.

Notes: Stocks, exports and consumption are expressed on a milled basis in marketing years.

ENDNOTES TO GRAIN: WORLD MARKETS AND TRADE

REGIONAL TABLES

North America: Canada, Mexico, the United States.

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama.

Caribbean: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Bermuda, British Virgin Islands, Cayman Islands, Cuba, Dominica, Dominican Republic, French West Indies, Grenada, Guadeloupe, Haiti, Jamaica and Dep, Leeward-Windward Islands, Martinique, Montserrat, Netherlands Antilles, Puerto Rico, Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago, Turks and Caicos Islands, Virgin Islands of the U.S.

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Falkland Islands (Islas Malvinas), French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela.

EU: Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

Other Europe: Albania, Azores, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, Macedonia, Montenegro, Norway, Serbia, Switzerland.

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan.

Middle East: Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, Yemen.

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia.

Sub-Saharan Africa: all African countries except North Africa.

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan.

South Asia: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, Maldives.

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam.

Oceania: Australia, Fiji, New Zealand, Papua New Guinea.

OTHER NOTES

Local Marketing Years (LMY): LMY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's LMY for that commodity (2015/16 starts in 2015); except for summer grains in certain Southern Hemisphere countries and for rice in selected countries, where the second year begins the LMY (2015/16 starts in 2016). Key exporter LMY's are:

Wheat	Corn	Barley	Sorghum
Argentina (Dec/Nov)	Argentina (Mar/Feb)	Australia (Nov/Oct)	Argentina (Mar/Feb)
Australia (Oct/Sep)	Brazil (Mar/Feb)	Canada (Aug/Jul)	Australia (Mar/Feb)
Canada (Aug/Jul)	China (Oct/Sep)	European Union (Jul/Jun)	United States (Sep/Aug)
China (Jul/Jun)	South Africa (May/Apr)	Russia (Jul/Jun)	
European Union (Jul/Jun)	United States (Sep/Aug)	Ukraine (Jul/Jun)	
India (Apr/Mar)		United States (Jun/May)	
Kazakhstan (Jul/Jun)			
Russia (Jul/Jun)			
Turkey (Jun/May)			
Ukraine (Jul/Jun)			
United States (Jun/May)			

****Updated**** For a complete list of local marketing years, please see the FAS website (<https://apps.fas.usda.gov/psdonline/app/index.html#/app/downloads>).

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years. All trade tables contain Trade Year (TY) data which puts all countries on a uniform, 12-month period for analytical comparisons: wheat is July/June; coarse grains, corn, barley, sorghum, oats, and rye are Oct/Sept; and rice is calendar year.

EU Consolidation: The trade figures starting from 1999/00 represent the European Union (Croatia plus the former EU-27) and exclude all intra-trade. For the years 1960/61 through 1998/99, figures are the EU-15 and also exclude all intra-trade. EU-15 member states' data for grains are no longer maintained in the official USDA database. Data for the individual NMS-10, plus Bulgaria, Romania, and Croatia, exists only prior to 1999/00.

Statistics: (1) Wheat trade statistics include wheat, flour, and selected pasta products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

Unaccounted: This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.

The Global Commodity Analysis Division, Office of Global Analysis, Foreign Agricultural Service, USDA, Washington, DC 20250, prepared this circular. Information is gathered from official statistics of foreign governments and other foreign source materials, reports of U.S. agricultural attachés and Foreign Service officers, office research, and related information. Further information may be obtained by writing the Division or telephoning (202) 720-3448.

Note: The previous report in this series was Grain: World Markets and Trade December 2016. For further details on world grain production, please see World Agricultural Production January 2016.

This circular is available in its entirety on the Internet via the Foreign Agricultural Service Home Page. The address is: <http://www.fas.usda.gov>
