

# Oilseeds: World Markets and Trade

## Global Consumption Recovers in 2020/21 After 2019/20 Drop

Global Oilseed Production and Consumption

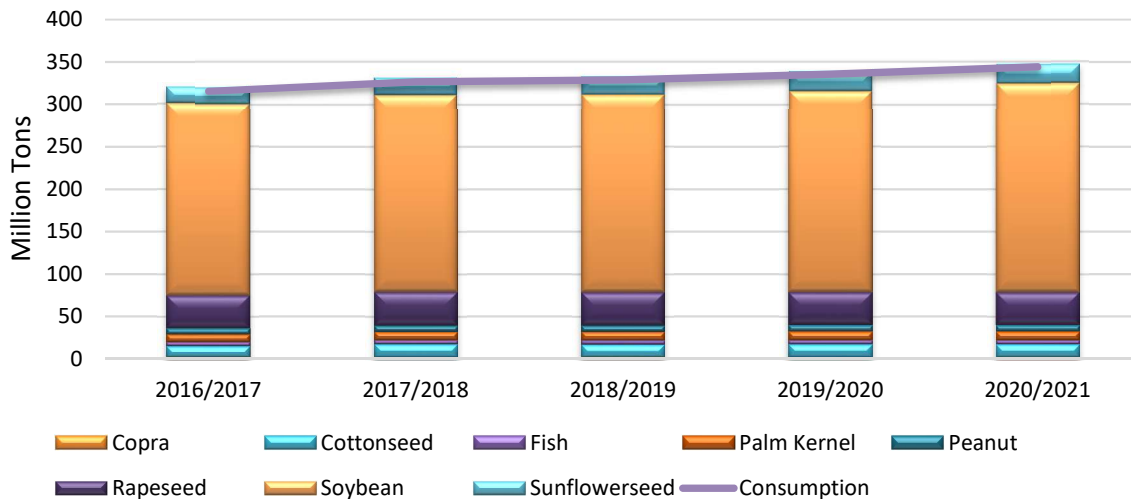

**Global oilseed production** is forecast to grow 5 percent in 2020/21, primarily on a rebound in soybean output in the United States and South America. Global oilseed production is projected to reach a record 605.9 million tons on record plantings. Soybean production is forecast to rise 26.6 million tons to a record 362.8 million tons, less than 3 million tons above the previous record set in 2018/19. Rapeseed, peanut, sunflowerseed, and palm kernel production are also forecast to increase with both sunflowerseed and palm kernel reaching records. Copra and cottonseed production are forecast to fall in 2020/21.

**Global oilseed consumption** is forecast to rise 2 percent in 2020/21, the strongest pace since 2017/18, reflecting slowly rebuilding feed demand in China following 2 years of declining pork production due to African Swine Fever. Soybean crush and consumption is projected to account for most of the growth in global oilseed use. Higher sunflowerseed consumption is largely offset by lower use of most other oilseeds.

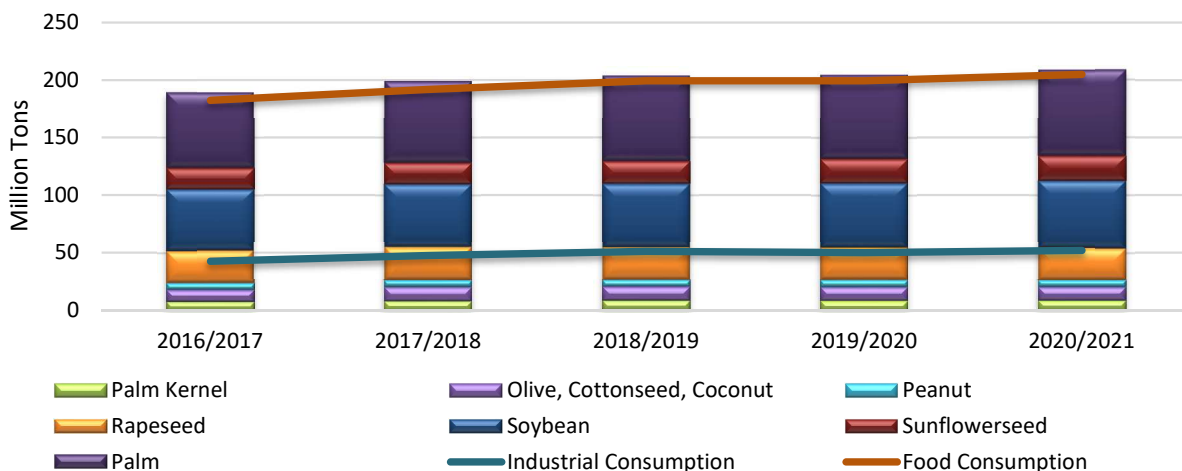

**Global oilseed trade** is forecast to increase mostly on higher soybean demand from China. Trade in other oilseeds is expected to be nearly unchanged except for sunflowerseed and rapeseed where trade is expected to rise modestly on larger exporter supplies. **Global ending stocks** are projected to fall slightly, pulled down by lower soybean and peanut stocks. Sunflowerseed ending stocks are forecast to recover from low level forecast for 2019/20.

## Global Protein Meal Production and Consumption

**Global oilseed meal production** is expected to grow in 2020/21, driven by expanded soybean meal production. **Global protein meal consumption** is also forecast to rise, mainly driven by robust demand from China. **Trade in protein meals** is expected to grow as well, with soybean, peanut, and palm kernel meals more than offsetting declining exports in copra, cottonseed, and rapeseed meals.

## Global Oils Production and Consumption

**Global vegetable oil production** is expected to grow modestly, with palm, sunflowerseed, palm kernel, and soybean oils offsetting declines in olive, peanut, cottonseed, rapeseed, and coconut oils. **Global food oil consumption** is forecast to expand after a year of slower growth due to the impact of the coronavirus pandemic. Palm, olive, and soybean oils are forecast to show strong food consumption growth of 3 percent or more. **Global industrial oil consumption** is also forecast higher in line with an expected recovery in biodiesel production in major markets. **Global vegetable oil trade** will recover following a year of declining global palm oil trade. **Global ending stocks** are forecast to decline on recovering demand.

## **OVERVIEW**

### **2019/20**

Global oilseed production is forecast at 575.2 million tons, down 1.9 million tons from April mostly on lower-than-expected soybean production. Soybean production is revised down 1.9 million tons to 336.2 million tons mostly due to lowered production in Argentina, Brazil, and Nigeria. Oilseed exports are up 2.7 million tons on Brazil's record soybean trade in March and April more than offsets a lower export forecast for the United States. Oilseed imports are raised on strong soybean demand from China. Oilseed crush is nearly unchanged. Oilseed ending stocks are forecast to fall 1.4 million tons as larger rapeseed and sunflowerseed crush and strong Brazil soybean exports reduce carryover into 2020/21.

Global meal production is nearly unchanged as lower soybean and cottonseed meal production is offset by increased output of rapeseed, sunflowerseed, and palm kernel meal. Meal exports are revised up on higher fish meal and soybean meal trade, while global consumption is revised down slightly. Global oil production is revised slightly down due to lower palm oil production in Malaysia. Oil trade and consumption are down significantly on lower demand due to COVID-19. Global oil imports are adjusted 3 percent lower to 80 million tons primarily on lower palm oil trade which is reduced 5 percent. Global oil food use and industrial use are revised down 2 percent in response to the slowing global economy and reduced demand for transportation use. The U.S. season average farm price for soybeans is lowered \$0.15 to \$8.50 per bushel.

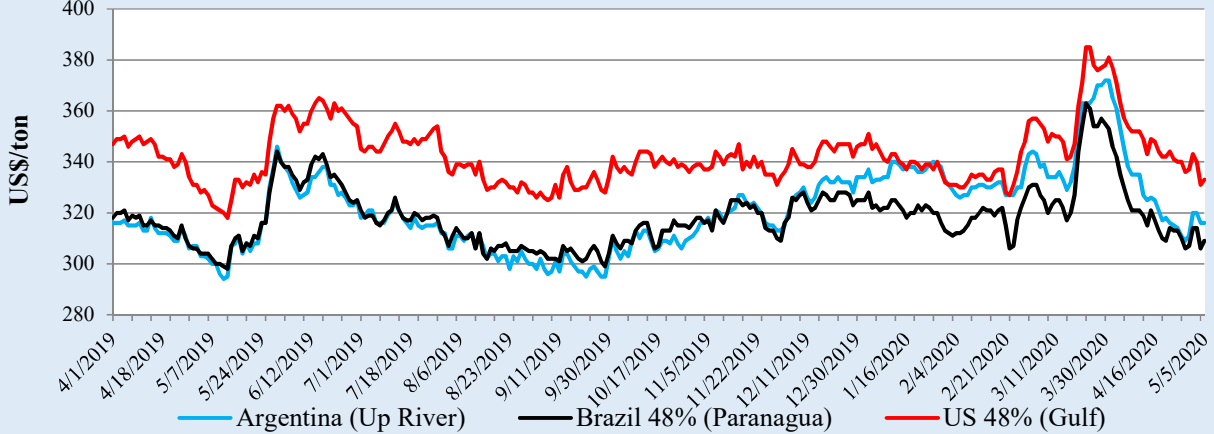

## **EXPORT PRICES**

Both soybean and meal export prices have experienced a downturn since the beginning of April in response to rapidly changing market forces due to the COVID-19 global pandemic. U.S. Gulf FOB soybean export bids in April averaged \$337/ton, down \$8 from March. Brazil Paranagua FOB averaged \$334/ton, down \$6. Argentina Up River FOB averaged \$326/ton, up \$2. Meal export prices dropped at a fast pace for the month as demand fell in response to meat processing facility closures and shrinking livestock herds. U.S. soybean meal export bids in March averaged \$349/ton, down \$12 from March. Brazil Paranagua FOB averaged \$319/ton, down \$18 from March, and Argentina Up River FOB averaged \$328/ton, down \$20. Soybean oil prices continued to weaken due in part to the impact of COVID-19 and low petroleum prices on food and fuel markets with monthly average declines of \$31/ton in the United States and \$21/ton in both Argentina and Brazil. Malaysia palm oil prices moved largely in tandem with soy oil prices during the beginning of April, but then stagnated toward the end of the month, averaging \$562/ton, down \$24 from March. Indonesia palm oil prices continued to decline, down \$8 from the previous month.

## SOYBEAN EXPORT PRICES

## SOYBEAN MEAL EXPORT PRICES

## SOYBEAN AND PALM OIL EXPORT PRICES

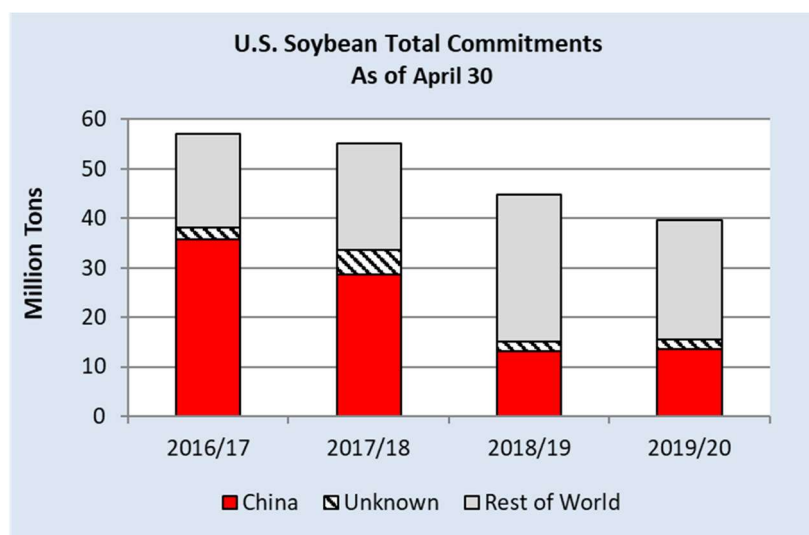

Source: International Grains Council. For the period 3/20 to 4/8 Indonesia palm oil price data is not available. The 3/19 price is displayed for this period.

## EXPORT SALES

In the week ending April 30, 2020, U.S. soybean accumulated exports (shipments) to China totaled 12.6 million tons and 21.6 million to the rest of the world, up 4 percent 2019, but 22 percent lower than 2017. Outstanding sales grew more than 400,000 tons from last month on higher sales to China; however, these remain below 2019 levels at 970,000 tons to China and 2.5 million to the rest of the world. Last year at this time, accumulated exports to China were 5.9 million tons and 26.9 million to the rest of the world and outstanding sales to China were 7.4 million tons and 2.9 million to the rest of the world. U.S. soybean export commitments (outstanding sales plus accumulated exports) to China exceeded 2019 levels slightly, totaling 13.5 million tons compared to 13.3 million a year ago. However, export commitments to China continue to trail 2018 and 2017 levels. Total commitments to the world remain lower than last year, totaling 39.7 million tons compared to 44.9 million tons the year before.

## 2019/20 OUTLOOK CHANGES

Note: All figures are in thousand metric tons.

Country	Commodity	Attribute	Previous	Current	Change	Reason
United States	Oilseed, Soybean	Exports	48,308	<b>45,586</b>	-2,722	Competition with Brazil
Argentina	Oilseed, Soybean	Exports	8,200	<b>8,000</b>	-200	Slower export pace in repose to strong Brazilian sales
	Oilseed, Soybean	Imports	3,900	<b>3,800</b>	-100	Trade trend
Bangladesh	Oilseed, Soybean	Imports	2,300	<b>2,100</b>	-200	Less crush demand
Brazil	Oilseed, Soybean	Exports	78,500	<b>84,000</b>	5,500	Record March and April trade
	Meal, Soybean	Exports	16,000	<b>16,300</b>	300	Trade to date and improved competitiveness with weaker currency
Canada	Meal, Rapeseed	Exports	4,850	<b>5,000</b>	150	Increased sales to the United States.
China	Oil, Palm	Imports	6,900	<b>6,200</b>	-700	Lower production in Malaysia
	Oilseed, Peanut	Imports	650	<b>850</b>	200	Trade pace
	Oilseed, Soybean	Imports	89,000	<b>92,000</b>	3,000	Higher global supply
European Union	Oil, Palm	Imports	7,300	<b>6,650</b>	-650	Lower global supply and decreased domestic demand due to COVID-19
India	Oil, Palm	Imports	9,750	<b>9,000</b>	-750	Lower demand due to COVID-19
	Oil, Soybean	Imports	3,345	<b>3,200</b>	-145	Lower food demand
Indonesia	Meal, Palm Kernel	Exports	4,980	<b>5,150</b>	170	Lower domestic feed use
	Oil, Palm	Exports	29,110	<b>27,500</b>	-1,610	Trade pace and lower demand due to COVID-19
	Oilseed, Soybean	Imports	2,875	<b>2,600</b>	-275	Lower food use due to COVID-19
Japan	Oilseed, Rapeseed	Imports	2,400	<b>2,240</b>	-160	Crushing preference for soybeans and lower oil demand due to COVID-19
Korea, South	Oilseed, Soybean	Imports	1,400	<b>1,265</b>	-135	Revised down to account for high imports in late 2018/19
Malaysia	Oil, Palm	Exports	17,350	<b>16,300</b>	-1,050	Revised down on lower production.
Pakistan	Oil, Palm	Imports	3,275	<b>3,175</b>	-100	Reduced food demand
Peru	Meal, Fish	Exports	890	<b>1,100</b>	210	Reflecting 2019 trade
Senegal	Oilseed, Peanut	Exports	200	<b>380</b>	180	Increased exports to China
Thailand	Meal, Soybean	Imports	3,100	<b>2,800</b>	-300	Less feed use due to COVID-19
	Oilseed, Soybean	Imports	3,400	<b>3,080</b>	-320	Less demand due to COVID-19

## **2020/21 OUTLOOK**

### **SOYBEANS**

---

Global **soybean** production in 2020/21 is forecast to surge to 362.8 million tons, up 8 percent from the 2019/20 estimate and 2.5 million tons above the 2018/19 record. Two factors are driving this increase: a rebound in plantings and yield in the United States and record area forecast in Brazil. Combined, Brazil and the United States are forecast to account for roughly two-thirds of global production and well over three-quarters of global soybean production growth.

Wet weather in much of the Midwest in 2019 delayed U.S. plantings of corn and soybeans and led to reductions in area planted and harvested and contributed to lower yields in many areas. While area harvested is forecast to rebound in 2020 to 33.5 million hectares, it will fall 2 million tons short of 2018. Yields are expected to return to trend with normal weather. In Brazil, a precipitous fall in the value of the real has resulted in record local prices. Strong early buying from China has pushed soybean exports to record levels in March and April, further encouraging area expansion in the coming year to 38.3 million hectares. Yields are also expected to improve over the current harvest which was reduced by dry weather in some areas. Soybean production in Brazil is forecast to reach a record 131.0 million tons.

With expanding production, global soybean supplies will reach record levels. Demand, led by a rebound in China, is projected to exceed supply growth, resulting in a further draw-down in global ending stocks. Expansion of China's swine herd, recovering from African Swine Fever, will help boost feed demand and drive both crush and import demand higher. China is projected to account for over half of global consumption growth in 2020/21 and roughly 85 percent of import growth. Export growth for the coming year will need to come from the United States as it may be difficult for South American suppliers to exceed current Oct/Sep 2019/20 export forecasts. Argentina exports are projected to decline in the face of strong competition from the United States and Brazil and growing domestic crush.

Global **soybean meal** consumption is projected to rise 4 percent on growing China demand. The country accounts for nearly one-third of global consumption and more than half of growth in consumption. Global meal exports are forecast to grow 1 percent in 2020/21, near historic trends. Three-quarters of total trade is expected to be supplied by South America. Argentina and India are projected to meet most of the growth in trade in 2020/21 as rising feed demand in the United States and Brazil will account for nearly all of the increase in their meal production. India's meal exports are forecast to reach 1.9 million tons, up 420,000 tons from 2019/20's depressed level.

**Soybean oil** consumption is projected to rise 4 percent, mostly on the strength of China demand where increased supplies of domestically produced oil will substitute for other oils. Exports are forecast to rise 2 percent in 2020/21 with total global volume projected to reach 11.8 million tons, a new record. Half of this will be supplied by Argentina where higher crush and lower demand for biodiesel will boost exportable supplies.

## Highlights

- **U.S.** soybean exports are projected to rise 10.2 million tons to 55.8 million as increasing China demand and tight Brazil supplies in late 2020 boost sales. Soybean meal exports are forecast slightly lower at 11.9 million. Soybean oil exports are expected to decline 204,000 tons to 953,000 tons in response to rising exportable supplies in Argentina and slowing global demand growth.
- **Argentina** soybean exports are projected to fall to 6.5 million tons with heightened competition from the United States and Brazil. Soybean meal exports are forecast to grow 650,000 tons to 29.7 million with oil rising 500,000 tons to 6.0 million on increased crush and exportable supplies.
- **Bangladesh** soybean imports are forecast to rise 200,000 tons to 2.3 million on continued growth in crush. Larger domestic supplies will restrict product imports with soybean meal imports projected slightly lower at 425,000 tons while soybean oil imports are unchanged at 800,000 tons.
- **Brazil** soybean exports are projected down 1.0 million tons to 83.0 million on expected lower October-to-January trade. Soybean meal and oil export projections are unchanged from 2019/20.
- **China** soybean imports are projected up 4.0 million tons to 96.0 million in response to a rebound in hog numbers. Soybean meal exports remain stable at 1.0 million tons. Oil imports are forecast to rise 200,000 tons on stronger consumption growth vis-a-vis most other vegetable oils
- **European Union** soybean imports are projected to decline 200,000 tons to 14.9 million as larger meal availability from Argentina encourages a shift to meal imports. Soybean meal imports are forecast to rise 250,000 tons to 18.8 million. Trade in soybean oil (imports and exports) is mostly unchanged from 2019/20 forecast levels.
- **India** soybean crush is forecast to rise 1.1 million to 9.4 million tons with an expected larger crop in 2020. This will allow soybean meal exports to rebound 420,000 tons to 1.9 million. Soybean oil imports are forecast to rise slightly to 3.2 million tons as rising domestic supplies and slow vegetable oil consumption growth impacts import demand.
- **Pakistan** soybean imports are forecast to grow 200,000 tons to 2.4 million, reflecting a trend towards rising domestic crush. Soybean product imports are mostly unchanged in response to growing domestic supplies.
- **Vietnam** soybean and soybean meal imports are projected to grow 40,000 and 100,000 tons each to 1.9 and 5.4 million tons, respectively. This reflects the trend toward weak meal consumption growth observed over the past few years.

## RAPSEED

---

Global **rapeseed** production in 2020/21 is projected to rise 2.6 million tons, 4 percent above the current year, but 4.2 million tons below the record set in 2017/18. Production gains are forecast for Australia in response to better weather and Ukraine on improved yield. Production in Canada is also projected to rise. Despite declining export trends, rapeseed production remains a profitable part of many producer's crop rotations. Forecast production in the European Union and China are nearly unchanged from 2019/20. Exports are forecast to rise 2 percent with larger exports from Australia and Ukraine offsetting lower trade from Canada which still faces restrictions in sales to China. With global rapeseed crush marginally lower, production and consumption of rapeseed meal and oil are also projected mostly unchanged in 2020/21. Meal exports are forecast to decline 2

percent with lower supplies and increased competition from soybean meal. Rapeseed oil exports are projected to rise 1 percent with stronger projected import demand from China and the United States.

## Highlights

- **U.S.** rapeseed imports are projected higher at 612,000 tons. Meal imports are projected to decline 2 percent while oil imports are forecast to rise nearly 5 percent, reaching 3.4 million and 2.0 million tons respectively.
- **Australia** rapeseed exports are forecast to increase 300,000 tons to 2.1 million tons on a further rebound in production. Rapeseed oil exports are unchanged at 150,000 tons.
- **Canada** rapeseed exports are projected 300,000 tons lower at 8.9 million tons as restrictions on trade remain in place and competition from increased exportable supplies in Ukraine and Australia pressure exports to the European market. Exports of rapeseed meal and oil are also forecast 2 to 3 percent lower.
- **China** rapeseed imports are projected unchanged at 2.5 million tons as restrictions on imports from Canada persist. Imports remain at only about half of the level reached in 2017/18. Rapeseed meal imports are forecast to decline 80,000 tons to 1.4 million in the face of increased soybean meal supplies. Rapeseed oil imports are projected to rise 75,000 tons to 1.7 million, partially offsetting lower supplies.
- **European Union** rapeseed imports are projected to rise 200,000 tons to 6.0 million. Rapeseed imports will continue at historic highs as production remains near last year's low level. Rapeseed meal and oil imports are projected to be marginally below the current 2019/20 forecasts.
- **Ukraine** rapeseed exports are projected 400,000 tons higher at 3.4 million in 2020/21 reflecting a 535,000-ton increase in production to 4.0 million. With rapeseed crush forecast up 150,000 tons, both meal and oil exports are expected to rise proportionally with the larger supplies.

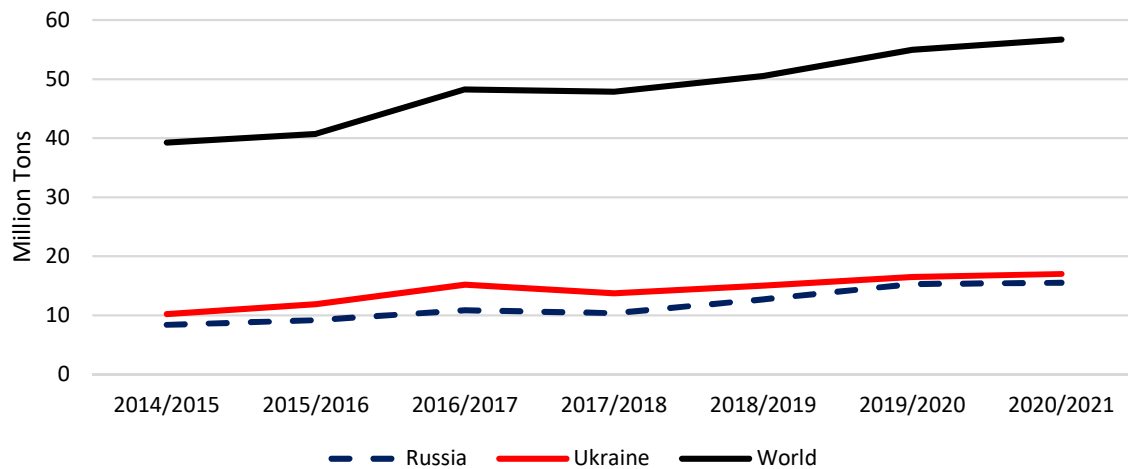

## SUNFLOWERSEED

---

Global **sunflowerseed** production in 2020/21 is forecast at a record 56.7 million tons, driven by a record 27.1 million hectares of harvested area. Much of the increase is forecast in Argentina and Ukraine with lower growth in the United States, Russia, and Moldova. Production in the European Union is expected to remain stable while only Turkey is forecast to see a production decline in the coming year.

Production of this increasingly popular commodity has grown by 17 percent since 2016/17. Despite consistently growing supply, stable prices have contributed to the appeal of this crop for many producers. Market volatility resulting from the coronavirus pandemic has introduced the first period of significant price fluctuations for sunflowerseed and sunflowerseed products in recent history.

## Sunflowerseed Production

Global sunflowerseed crush is projected to grow to 51 million tons. With sunflowerseed production outpacing crush, stocks are forecast to grow sharply.

Global **sunflowerseed meal** exports are forecast to grow slightly on continued growth in demand in the European Union, Turkey, and smaller markets offsetting plummeting China demand.

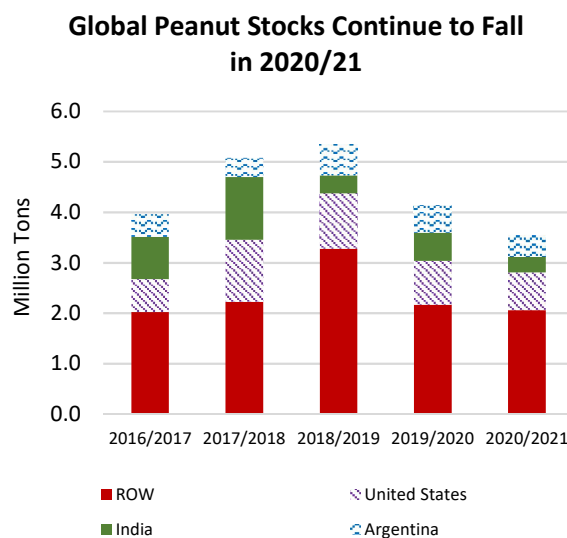

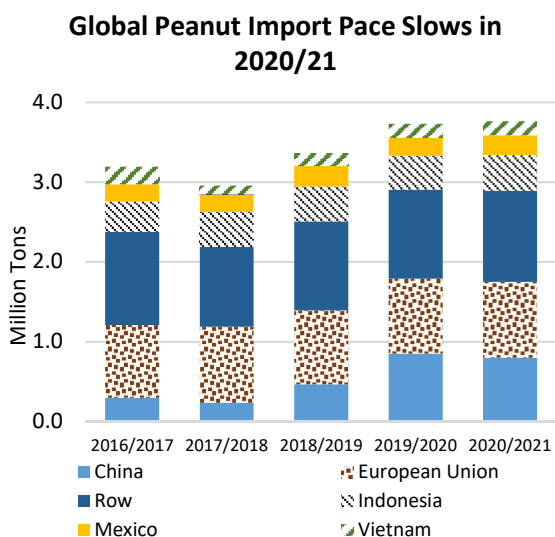

**Sunflowerseed oil** exports are forecast up 3 percent to 12 million tons. Declining demand in India and the European Union and the United States is offset by growing demand in China and the Middle East. Consumption growth should be sufficient to keep global oil stocks virtually flat while meal stocks will decline marginally from their 2019/20 high.

### Highlights

- **Ukraine** sunflowerseed exports are forecast to nearly double to 150,000 tons. Sunflowerseed meal exports are expected to grow to 5.1 million tons and oil exports are forecast to grow to 6.5 million tons.
- **Russia** sunflowerseed exports are unchanged at 650,000 tons. Sunflowerseed meal exports are forecast to decline 125,000 tons to 1.7 million tons due to increased domestic consumption while oil exports are projected to grow 150,000 tons to 3.3 million.
- **European Union** sunflowerseed imports and exports are forecast to decline to 620,000 tons and 550,000 tons respectively. Sunflowerseed meal imports are forecast to grow 100,000 tons to 3.7 million. Sunflowerseed oil imports are projected to fall slightly.
- **India** sunflowerseed oil imports are forecast 100,000 tons lower to 2.6 million tons.
- **China** sunflowerseed imports are projected up to 450,000 tons, while exports are expected to fall to 400,000 tons. Sunflowerseed meal imports are forecast to fall sharply to 800,000 tons. Sunflowerseed oil imports are forecast up at 1.4 million tons.
- **Turkey** sunflowerseed imports are expected to reach 975,000 tons. Meal imports are forecast at 1.2 million tons and oil imports are forecast to remain flat at 550,000 tons.

## PEANUTS

Global **peanut** production in 2020/21 is forecast up slightly as lower production in India is more than offset by increases in Sub-Saharan Africa production. However, lower carryin results in lower global supplies. Peanut trade is projected to be nearly unchanged while lower crush in China and India will result in reduced consumption of meal and oil and minimal change in product trade volumes.

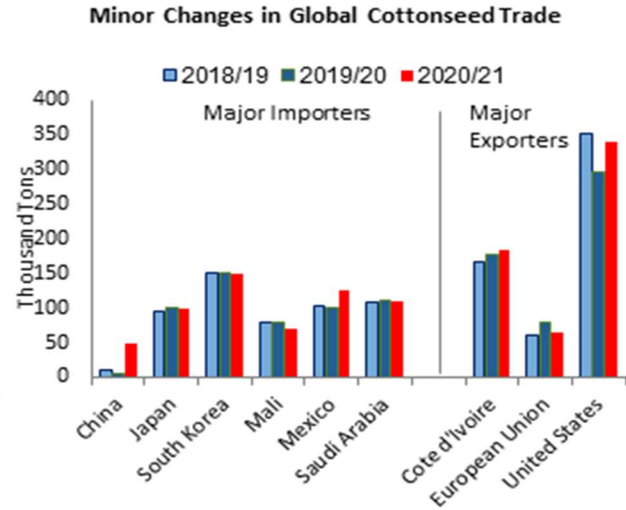

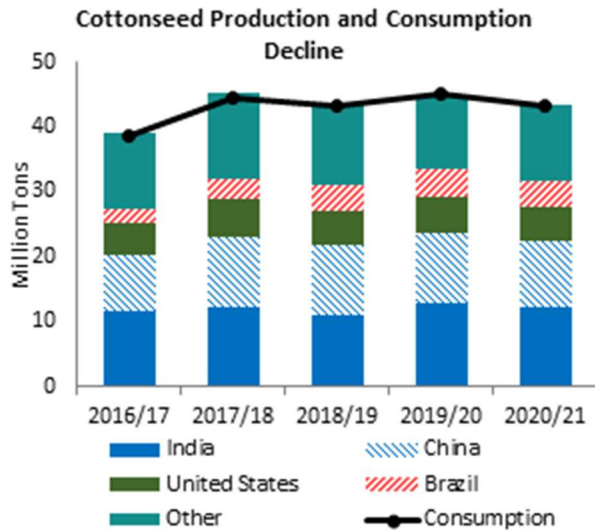

## Highlights

- **U.S.** production is forecast to rise 170,000 tons to 2.7 million on larger plantings and higher trend yield. Exports are forecast to decline nearly 9 percent to 590,000 tons. However, larger domestic demand is projected to offset the loss in exports and continue the trend in declining stocks.
- **Argentina** exports are projected to rise 100,000 tons to 950,000 on increased supplies.
- **India** exports are reduced 75,000 tons to 675,000 tons on lower supplies. Production is forecast to fall 700,000 tons to 5.5 million leading to lower domestic disappearance and stocks.
- **China** imports are forecast to fall 100,000 tons to 750,000 following a near-doubling of imports estimated for 2019/20. Many of these imports are from Sub-Saharan Africa and are destined for crush. Peanut exports are nearly unchanged and near the long-term average.
- **European Union** imports are nearly unchanged at 950,000 tons.
- **Senegal** exports are down slightly to 350,000 tons.
- **Vietnam** imports are 10,000 tons higher to 175,000.

## COTTONSEED

2020/2021 global **cottonseed** production is projected at 43.7 million tons, down 3 percent from the current year. Lower forecasts for India, Brazil, and China are expected to more than offset gains in Australia and Argentina. U.S. production is forecast flat from 2019/20. Global exports are nearly unchanged from the current year. Consumption is forecast down slightly driven mostly by crush and feed use.

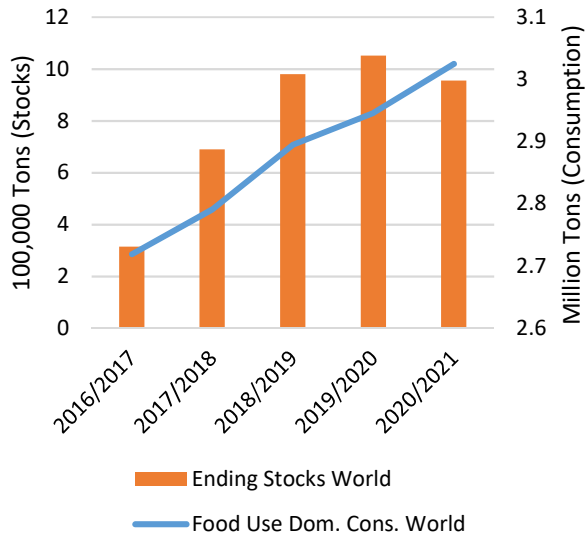

## Highlights

- **U.S.** exports are forecast up 91,000 tons to 386,000.
- **EU** exports are projected to fall 15,000 tons to 65,000.
- **China** imports are forecast to jump 45,000 tons to 50,000.
- **Mexico** imports are expected to grow 25,000 tons to 125,000.
- **Japan, Saudi Arabia, and South Korea** imports are unchanged.

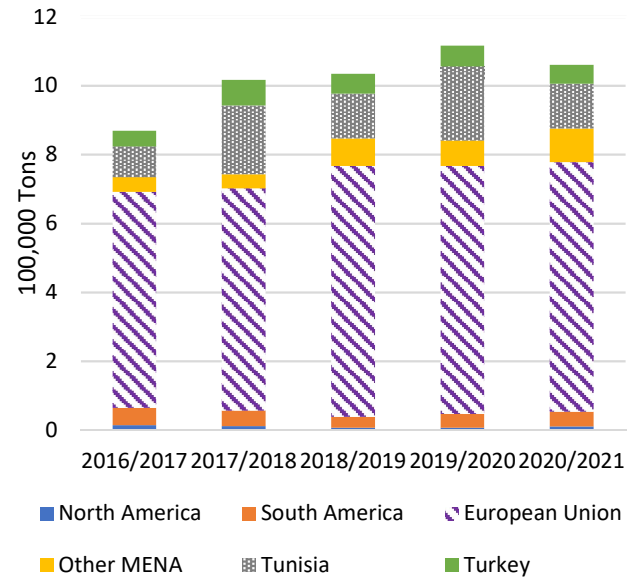

## OLIVE OIL

European Union **olive oil** production is forecast to remain low in 2020/21 leading to a third consecutive year of declining global production. This will be partially offset by continued strength in North Africa and the Middle East investments in olive oil processing and government policies aimed at increasing exports are slowly driving growth. High global stocks generated by strong EU production in 2018/19 are expected to decline in 2020/21 on higher consumption driven by consumer preference for olive oil use in in-home cooking. Olive oil prices have been falling since 2018 and are forecast to recover slightly in 2020/21. However, with prices remaining low relative to recent years, consumers are likely to see this oil as a “good value”, further incentivizing strong food-use consumption.

## Global Olive Oil Stocks and Consumption

## Olive Oil Exports

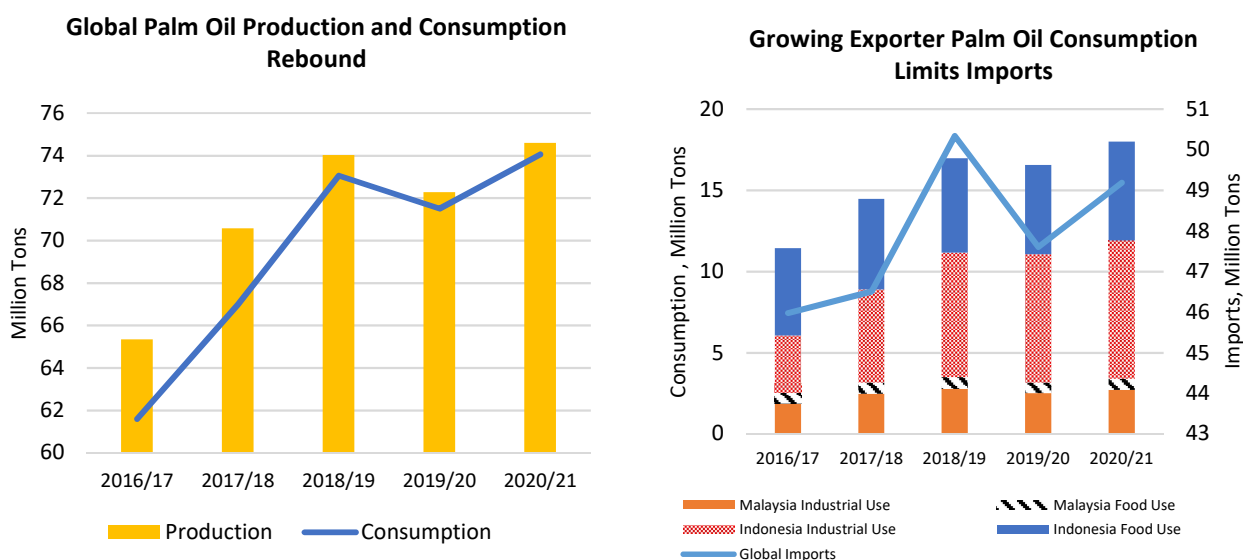

## Highlights

- **European Union** exports are forecast to grow slightly to 725,000 tons, leading to a significant drawdown in stocks.
- **Morocco** exports are forecast to nearly double to 45,000.
- **Tunisia** production is forecast to fall sharply due to an off-year in the production cycle of olive trees. Declining supply is forecast to lower exports to 130,000 tons.

## PALM OIL AND PALM KERNEL

Global **palm oil** production in 2020/21 is forecast to recover from declines in 2019/20 as Malaysia's production bounces back from adverse weather conditions. Imports are forecast up 1.6 million tons to 49.2 million tons as food and industrial demand recovers after economic blows from the coronavirus pandemic. Despite higher production, imports will remain below 2018/19 as more palm oil is used domestically in producing countries due to industrial use promotion policies in Malaysia and Indonesia. In addition, EU imports will fall due to declining food and industrial use.

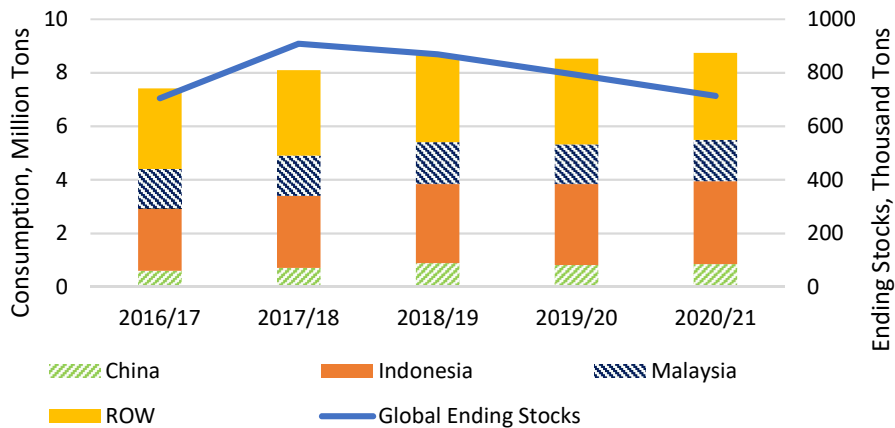

### Highlights

- **Indonesia** and Malaysia exports are both up slightly on production growth.
- **China** consumption is up slightly but remains below 2018/19 levels as higher soybean imports fulfill China's oil needs.
- **EU** imports are forecast to decline 300,000 tons to 6.4 million as industrial and food use fall.

Global **palm kernel** production in 2020/21 is forecast to rise 2 percent to 20.3 million tons, reflecting expected growth in palm oil production. **Palm kernel meal** imports are forecast flat as lower China demand (due to higher soybean imports) offsets stronger trade elsewhere. Demand for **palm kernel oil** is anticipated to increase slightly more than production as industrial use in China, Indonesia, and Malaysia returns to pre-coronavirus levels. As a result, oil ending stocks are forecast down 10 percent.

## Palm Kernel Oil Ending Stocks Lower as Consumption Edges Up

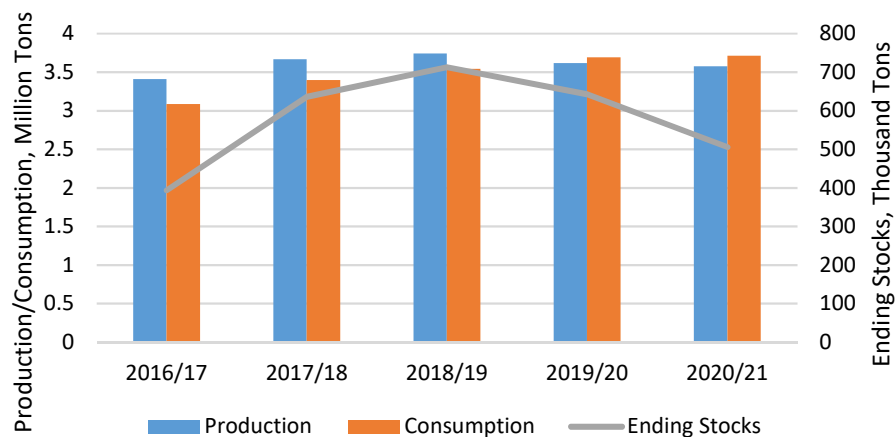

### Highlights

- **Indonesia** meal exports are up 150,000 tons to 5.3 million, and oil exports up 35,000 tons to 1.9 million on higher production.
- **Malaysia** meal exports are down 20,000 tons to 2.1 million on lower exportable supplies.
- **EU** oil imports are up 45,000 tons to 700,000. Meal imports are down 50,000 tons to 2.2 million.
- **New Zealand** meal imports remain nearly steady at 1.8 million tons.
- **China** meal imports are 50,000 tons lower to 650,000 on higher soybean imports. Oil imports are up 40,000 tons to 850,000 on higher demand arising from economic recovery.

### COPRA

Global **copra** production in 2020/21 is forecast to fall 2 percent to 5.8 million tons largely due to lower yields in the Philippines. **Copra meal** production is projected to decrease 1 percent to 1.9 million tons on lower output from the Philippines and Sri Lanka. Trade is forecast to remain flat from 2019/20 with global imports at 537,000 tons. **Coconut oil** production is forecast down slightly. However, higher demand is forecast to boost both imports and consumption slightly on a recovery in food and industrial use following the coronavirus pandemic. As a result, ending stocks will contract sharply.

## Copra Oil Ending Stocks Decline as Consumption Exceeds Production

### Highlights

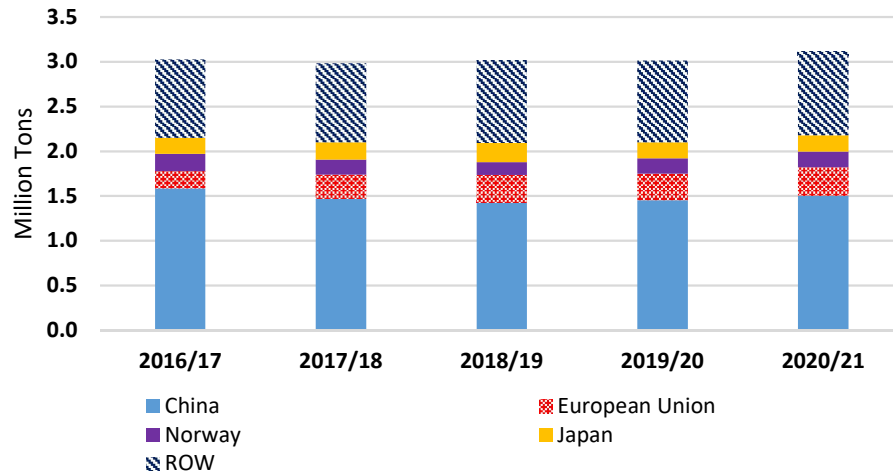

- **Malaysia** coconut oil imports are forecast to increase 8 percent to 265,000 tons, largely to provide additional oil for refining and export.
- **Philippines** oil ending stocks are forecast to fall 125,000 tons to 28,000 as production falls and as exports remain nearly unchanged at 1.0 million tons.
- **Indonesia** oil exports are forecast to grow faster than production, resulting in a draw-down in ending stocks.
- **India** copra meal imports and consumption are forecast flat from 2019/20.

### FISHMEAL

Global **fishmeal** production is forecast to increase less than 1 percent to 4.9 million tons as production is flat in Peru, the largest producer and exporter. Due to sustainability concerns, Peru continues to limit catch through quotas. Global imports are forecast up 3 percent on growth in China's aquaculture production as the country continues to diversify its protein production and on slightly higher EU imports. Global ending stocks are forecast to fall 23,000 tons to 222,000.

## Global Fishmeal Imports

### Highlights

- **Peru** exports and production are flat at 1.1 million tons.
- **China** imports are up 4 percent to 1.5 million tons.
- **EU** imports are up 7 percent to 320,000 tons.
- **Ecuador** production is up 7 percent to 80,000 tons.
- **Chile** production is up 3 percent to 370,000 tons.

## List of Tables

### **SUMMARY TABLES**

Table 01	Major Oilseeds: World Supply and Distribution (Commodity View)
Table 02	Major Protein Meals: World Supply and Distribution (Commodity View)
Table 03	Major Vegetable Oils: World Supply and Distribution (Commodity View)
Table 04	Major Oilseeds: World Supply and Distribution (Country View)
Table 05	Major Protein Meals: World Supply and Distribution (Country View)
Table 06	Major Vegetable Oils: World Supply and Distribution (Country View)

### **COMMODITY TABLES**

Table 07	Soybeans: World Supply and Distribution
Table 08	Soybean Meal: World Supply and Distribution
Table 09	Soybean Oil: World Supply and Distribution
Table 10	Soybeans and Products: World Trade
Table 11	Palm Oil: World Supply and Distribution
Table 12	Rapeseed and Products: World Supply and Distribution
Table 13	Sunflowerseed and Products: World Supply and Distribution
Table 14	Minor Vegetable Oils: World Supply and Distribution

### **HISTORICAL TABLES**

Table 15	World Oilseeds and Products Supply and Distribution
Table 16	World Soybeans and Products Supply and Distribution
Table 17	World Rapeseed and Products Supply and Distribution
Table 18	World Sunflowerseed and Products Supply and Distribution
Table 19	World Palm Oil, Coconut Oil, and Fish Meal Supply and Distribution

### **COUNTRY TABLES**

Table 20	United States Oilseeds and Products Supply and Distribution Local Marketing Years
Table 21	United States Soybeans and Products Supply and Distribution Local Marketing Years
Table 22	Brazil Soybeans and Products Supply and Distribution Local Marketing Years
Table 23	Argentina Soybeans and Products Supply and Distribution Local Marketing Years
Table 24	South East Asia Oilseeds and Products Supply and Distribution
Table 25	Middle East Oilseeds and Products Supply and Distribution
Table 26	European Union Oilseeds and Products Supply and Distribution
Table 27	China Oilseeds and Products Supply and Distribution
Table 28	India Oilseeds and Products Supply and Distribution

### **PRICES**

Table 29	Oilseed Prices
